

XTENZA MURA

XTENZA MURA - INTUITIVE CONTROL

When you want to adjust the volume, you don't want to look for the remote or touch-panel, let alone wait for the control app to start and then search for the right controls. Same story for adjusting lights, blinds or temperature. You just want to adjust them.

VBH INTRODUCES XTENZA

Xtenza is a series of intuitive control devices and techniques. The Mura button is especially designed for simple tasks. Mura consists of a LED touchpanel and a rotating outer ring.

At the twist of your hand, Mura enables you to control volume, lights, blinds and temperature.

Mura is IP67 rated so can be mounted inside your showercell. The touchpanel will even function with wet hands.

Mura will also be available in a furniture mounted version, the Seda, and there will be a wireless standalone version called Unica. Each Xtenza button comes standard in a variety of finishes. The coverplate and graphics can be customized to fit the ship's interior.

If you want to know more about Xtenza please contact us.
