>> HOME VIDEOS

Pulse is the all new media delivery platform by VBH that allows users to immerse themselves in a full range of stored and streaming audio-visual content on board. The platform is future proof; ready to accept new services, applications and other sources of content as they come on to the market. No more scrolling endlessly to find content – an easy search option makes it a breeze to find content.

### SMART CONTENT SUGGESTIONS

Access to all content is exceptionally easy thanks to the use of a smart content suggestion engine that ensures the shortest time from start to content immersion. Pulse includes a content management interface that facilitates the integration of content from various sources (discs, USB, network, etc.) The system can also easily be configured for operation by the crew or ETO.

### BRING YOUR OWN CONTENT - INCLUDING HOME VIDEOS

Create unique collections of movies or series based on language preferences or genre: movies, shows, memories and music, all accessible on one platform. Pulse is designed for smooth integration with the integrated control system Pivot.

## PULSE HARDWARE & SOFTWARE

The Pulse system consists of a server and players for each room or display you need.

Players are controllable with different types of remote controls.

### BRING YOUR OWN CONTENT - INCLUDING HOME VIDEOS

Pulse imports all your movies, music, and personal content libraries and automatically adds missing information, e.g. performers, synopsis. Pulse can import many different file types, so you can enjoy all your content in one place.

### INTERNATIONAL

Pulse supports multiple languages, e.g. English, Russian, French, Spanish, German, Chinese, Arabian, and Dutch. Perfect for international environments like superyachts. If you have a specific language request, it can be added.

### INFOTAINMENT

Do you want your guests to be able to see the menu of the day, the weather, the trip details? Pulse can provide just that. Tailor made infotainment options can be developed at request.

### USER MANAGEMENT

Easy for ETO to manage content, user rights and Pulse players. Parental control, private movies, etc. are all possible.

### SUPPORT

VBH offers 24/7 support for their clients. We have specialists that help you keep the system running smoothly.
